

# Barco Healthcare

Medical solutions portfolio

# About Barco

Focused on transforming the delivery of care, Barco connects healthcare professionals at every patient touchpoint, from the imaging room to radiology, through specialist consultations and in the surgical suite. We offer a network of medical imaging solutions that deliver the complete picture to support more informed decisions, when and where it matters most.

## Diagnostic displays

Recognized as the Visionary Innovation Leader in medical displays by Frost & Sullivan

Recognized as the Technology Leader in the Multi-modal Medical Display Industry by Frost & Sullivan

# More than a medical display

Increasing image volumes, the growing complexity of studies, and physical discomfort while reading are the three biggest challenges radiologists face today. That is the conclusion of a 2014 survey conducted by The MarkeTech Group. The solutions? Improved image quality (91%), a more efficient workflow (77%), and better display ergonomics (70%), as indicated by radiologists themselves.

We are able to provide capabilities that can improve the reading experience in all aspects: speed, accuracy, intuitiveness, flexibility and ergonomics. How? By offering a complete imaging solution – high-quality display, ultra-fast controller for fast image loading and manipulation and automated calibration & QA to ensure peak performance and uptime – in which all components function smoothly as a unified system.

Barco's integrated technology platform enables us to develop a unique set of Intuitive Workflow features resulting in increased reading accuracy and decreased reading time. Only Barco display systems offer this diagnostic toolset, which adds a new dimension to radiologists' workflow by streamlining frequent tasks with automated features. Designed to help you speed through your workload with ease, these built-in, easy-to-use functions appear at your command, seamlessly paving the way for effortless productivity and working comfort.

# QAWeb Enterprise

Always a clear view

QAWeb Enterprise helps you manage quality and assure compliance of your expanding healthcare enterprise with less effort, lower cost, and complete confidence. This fully automated and secure system guarantees consistent image quality and uptime for all PACS display systems within your facility and across your enterprise.

## Wants and woes of healthcare IT managers

[Read more](#)

QAWeb Enterprise video

## What makes QAWeb so unique?

- > Scalable: Powerful tools to manage workstations from anywhere, at anytime
- > Flexible: Customize policies to meet your quality requirements
- > Intuitive: Effortless compliance and smart reporting
- > Secure: Assured security and patient privacy

[Download QAWeb](#)

# Coronis Uniti®

mammography radiology

The only diagnostic display system explicitly designed for both PACS and multimodality breast imaging. Unique in its representation of calibrated color and grayscales. Remarkable in its 2D and 3D capabilities. Capable of both static and dynamic imaging.

## Your benefits

- > One display for all images to unify your workflow
- > 12% more pixels to display more or larger images
- > The brightest display on the market - delivers exceptional brightness resulting in more JNDs
- > Proven 10% higher detection when scrolling digital breast tomosynthesis images<sup>1</sup>
- > Up to 30% increased detection probability thanks to patented I-Luminate™ technology<sup>2</sup>
- > Optimized for the standard field of vision and low reflection to minimize eye-fatigue
- > Intuitive workflow tools selectively dim/boost and focus light for closer inspection
- > Cleared for multimodality breast imaging, incl. breast tomosynthesis, 3D mammography, breast MRI, breast ultrasound, CT and ultrasound, including vascular and gynecological ultrasound

Models and options

Meet Coronis Uniti

# Coronis Fusion

radiology

Coronis Fusion, perfected for color imaging with vivid and calibrated colors to help you see important color image details. Ergonomically designed to reduce repetitive stresses. Optimized for an efficient workflow with clinical tools proven to increase accuracy and decrease reading times.

## Your benefits

- > Bright, calibrated luminance of 600 cd/m2 for the lifetime of the display
- > Uniform luminance with patented Color PPU technology
- > High contrast of 2000:1 to see subtle image details
- > SteadyColor™ calibration technology to see details in the important color content of images
- > Wide Gamut display
- > Wide viewing angle in your field of view
- > Higher brightness allows you to see more details with less eye strain
- > SoftGlow™ task and wall lighting
- > Barco Optical Glass™ reduces reflections and improves contrast
- > SpotView™ to see more details in the image more quickly – increased accuracy and decreased reading time
- > Auto QA and compliance tests meet the latest regional standards
- > Assure compliance and uptime of all your PACS workstations
- > Intervention-free QA saves time, reduces effort and cost

Models and options

## Coronis Fusion by numbers

Meet Coronis Fusion

# Coronis

mammography radiology

A family of diagnostic displays ideal for high-quality imaging of diagnostic modalities. Engineered down to the smallest detail to ensure perfect luminance and DICOM compliance.

## Your benefits

- > The brightest 3MP display on the market exceeding ACR guidelines
- > Exceptional local contrast optimized for faster reading
- > Subtle details are more conspicuous for easy detection (Per Pixel Uniformity)
- > Real-time intervention-free calibration and QA
- > Factory-fit glass front cover reduces reflections (<0.5%)
- > Comes with I-Luminate to aid in seeing subtle image details

Models and options

# Nio

mammography radiology

A family of diagnostic displays that bring dependable diagnostic imaging to its true potential. Nio's proven technologies ensure diagnostic confidence at all times, making it the standard for the radiology reading room.

## Your benefits

- > Most efficient dual-head option on the market
- > Highest brightness and contrast - luminance ratio exceeds ACR guidelines
- > Minimal image manipulations – less windowing, leveling, zooming & panning
- > More DICOM JNDs to see more subtle details quicker
- > Uniform image rendering center to edge
- > Factory-fit front cover reduces reflection and improves visible contrast

### More screen, more mammo Nio Color 5MP

- Designed for radiology and mammography
- High-bright, steady colors and grays with SteadyColor technology
- Front sensor and QAWeb for always-on compliance

## Clinical displays

A family of clinical displays for use in key clinical specialties and dental practices. Eonis delivers unmatched image consistency – providing healthcare professionals with consistent images, wherever they are – to make collaboration between specialists easier. Eonis displays can be managed centrally with QAWeb.

### Your benefits

- > Designed and approved for hospital and dental environments
- > Ambient Light pre-sets for dark rooms, offices and the OR
- > Supports efficient inter-disciplinary collaboration with consistent quality controlled images
- > Cleanable displays for infection control (70% alcohol-based cleaning agents), safe for near-patient use
- > Efficient and intelligent enterprise IT workflow thanks to a built-in sensor with software tool to manage quality and assets
- > Lowest cost-of-ownership over time without a need for capital budget

## Surgical displays

A family of surgical displays designed for real-time critical imaging in the operating room. The portfolio comprises near-patient and large-screen displays for use in any environment where surgical procedures are carried out, including the endoscopy room, interventional suite or hybrid OR. Available in high definition or 4K ultra-high definition.

### Your benefits

- > Deep blacks and accurate colors from any viewing angle
- > 4:4:4 chroma subsampling for impeccable color accuracy
- > Near-zero latency provides perfect surgical hand-eye coordination
- > Improved visualization in high ambient light environments
- > Backlight output stabilization guarantees image stability and brightness over the lifetime of the display
- > Cleanable infection control design complies with strict OR hygiene standards
- > Unique cable management system makes it easy to install and disinfect
- > Automated failover feature so a backup signal is always available
- > Perfect match with Barco's Nexxis [OR-over-IP platform for full OR integration](#)

# Smart displays and user interfaces

## Smart displays and user interfaces

surgery

EMR

other

A range of displays that offer an intuitive, ergonomic touch experience, specially designed for use in a medical environment. They can be used for a variety of applications, including the digital operating room and medical carts. Wherever clinicians need access to detailed information, at the touch of a fingertip.

### Your benefits

- > Multi- and single-touch functionality for quick operation
- > Ergonomic interaction, even when wearing gloves
- > Fit for use in highly demanding, mission-critical environments
- > Special design that allows for easy cleaning and infection control
- > Easy to install, whether on carts, arms or booms

**Barco technologies  
that make a difference**

## I-Guard™ front sensor

This integrated, patented front-of-screen photometer has become the industry-standard technology for monitoring image quality and DICOM consistency. The new generation of I-Guard has been improved to measure much finer gradations of colors spread over the color gamut of the display. Combined with Barco's QAWeb service, it provides an easy-to-use tool for calibration and Quality Assurance.

### Benefits

- > Worry-free DICOM accuracy
- > Continuous, automated QA of the entire optical stack
- > Remote assessment of your display's image quality

## Ambient Light Compensation™ (ALC)

Ensures that your diagnostic display system remains DICOM compliant under all lighting conditions by monitoring display brightness compared to the ambient light level in the room. In combination with QAWeb, ALC warns you when the ambient light level exceeds a predefined threshold.

### Benefits

- > DICOM compliance under all lighting conditions
- > Optimal image quality in every environment so no detail goes unnoticed

## Uniform Luminance Technology™ (ULT)

LCD panels typically suffer from non-uniform behavior across more than 25% of the screen area, causing noise in the image. ULT eliminates those luminance and color non-uniformities, making sure that your display is compliant with DICOM GSDF across the entire screen area.

### Benefits

- > Uniform luminance across the entire screen
- > Perfect DICOM compliance from center to corner

## Color Per Pixel Uniformity™ (PPU)

Measures and adjusts the luminance of each pixel and makes it permanently DICOM compliant. As such, PPU eliminates screen noise, ensuring consistent colors and greyscales.

### Benefits

- > Reduced screen noise
- > Improved contrast and accuracy in fine details
- > Improved image quality at a lower dose to the patient

## Fusion

'Fusion' design replaces a dual-head display setup by a single, large-screen monitor without a hindering central bezel. It allows you to place more images on the screen – just the way you want – which has proven to increase productivity by up to 19% and reduce eye strain.

### Benefits

- > Improved reading productivity
- > Easy side-by-side comparison of studies
- > Reduced eye fatigue

## Barco Optical glass™

Reduces reflection, enhances image sharpness and viewing comfort. The multi-coated glass is highly durable, scratch-resistant, and protects the LCD panel from physical damage. A protective front cover – available on all Barco displays – further enhances the diagnostic experience.

### Benefits

- > Protection of your valuable LCD panel
- > Improved image contrast & minimal reflections
- > Easy and safe cleaning

## IPS-Pro

A breakthrough LCD architecture offering a significantly wider viewing angle than competing LCD technologies. It ensures images are displayed more accurately and with a higher contrast ratio near the sides of the display. With IPS-Pro, the viewing angle is 120°, which is nearly twice the value achieved by other technologies.

### Benefits

- > Superior diagnostic accuracy
- > Wider viewing angle improves multiuser viewing

## RapidFrame™

For high-speed cine imaging without blur when reviewing multi-frame image sequences – such as tomosynthesis, breast ultrasound and breast MRI – or when hovering over the image with the magnifying glass. RapidFrame technology counteracts motion blur by providing a high pixel refresh rate.

### Benefits

- > High-speed cine imaging without blur for fast interpretation
- > Increased screening efficiency due to highly efficient diagnostic workflow

## I-Luminate™

This brightness boost system has proven to increase detection of microcalcifications by up to 30%! Simply push the I-Luminate™ 'hot light' button to temporarily boost your display brightness. Combined with Barco's handy film clip, I-Luminate allows you to compare studies with film-based priors on the display.

### Benefits

- > Enhanced perception of small and low contrast details
- > Simplified comparison with film-based studies
- > Uninterrupted DICOM-compliance

## SteadyColor™ & SteadyGray™

Around 90% of images generated are now in color and color is often used for additional functionality (e.g. combining Doppler images with ultrasound). In order to guarantee consistent, perceptually linear color and still meet the DICOM standard for grayscales, SteadyColor executes advanced calibration for both grayscale and all Just Noticeable Differences (JNDs). This is achieved using multiple sensors in combination with numerous 3D Look-Up Tables (LUTs). SteadyGray uses the same color calibration technology to achieve a more constant and consistent gray appearance.

### Benefits

- > Maximize the diagnostic value of color in images
- > Maintain image quality and DICOM compliance under all lighting conditions

## SpotView™

SpotView creates a bright focal point on the screen, enhancing brightness and contrast inside a circular region of interest while dimming the surrounding image area. This heightens visibility of subtle differences in the image. With SpotView Mag, you can even double the size of the image so no detail goes unnoticed. There's a proven increase in accuracy and decrease in reading time.

### Benefits

- > Better visibility of subtle differences in the image
- > Extremely helpful when viewing pediatric extremities, breast calcifications and chest exams

## DimView™

DimView automatically dims the auxiliary displays used for patient worklists or dictation, reducing peripheral ambient light during readings so the eye can better focus on details on the diagnostic display.

### Benefits

- > Improved focus on the main display, no distractions
- > More ergonomic reading experience

## SmartCursor™/ FindCursor™

The use of multiple resolution displays in a PACS workstation results in the cursor often getting stuck traveling from one display to another, if you can even locate the cursor in the first place. SmartCursor maps the cursor to the correct places in the adjacent display. FindCursor indicates the location of the cursor with a highlighted circle.

### Benefits

- > Avoid losing time locating or moving the mouse cursor
- > Smoother and faster workflow

## VirtualView™

VirtualView provides radiologists with a virtual navigational head on the main display. It appears and disappears on user command, allowing you to add or remove this screen content at your convenience.

### Benefits

- > View other screen content more comfortably
- > Ideal for viewing worklists, research, dictation, or ancillary tasks
- > Reduce the number of displays needed; simplify the desktop

## Conference CloneView™

Conference CloneView software is a high-performance, easy-to-use tool for projecting medical images from a diagnostic display onto a large screen, especially useful in classroom settings.

### Benefits

- > High-quality cloned image without losing pixel precision
- > Fosters collaboration between peers
- > Ideal during multi-disciplinary team meetings

## Application Appearance Manager™

Application Appearance Manager allows you to individually manage the color profile and luminance of each application window so content appears as intended.

### Benefits

- > Seamlessly integrate color (e.g. color photos) into the diagnostic workflow
- > Manage the luminance of application windows depending on image content

## User Profiles

User Profiles creates a custom profile, set per modality and per user. It enables a quick environment switch for image type, such as a lower luminance for X-ray images and high

### Benefits

- > Read images according to your own preferences
- > Automatically get the right display settings for every modality

## SingleView™

SingleView enables the use of the entire display as one display, and eliminates any tearing down the center of the display.

### Benefits

- > More flexible desktop where images can be placed in the center of the screen
- > More ergonomic viewing experience

## Screenshot

Capturing ideal images for meetings and review, this tool enables you to take a screenshot of what is currently in focus.

### Benefits

- > Easy to communicate and share images and data
- > Fosters easy collaboration between peers

# Icon overview

 Standard 5-year warranty	 Front-of-screen sensor	 DICOM grayscale and color
 10 bit Look Up Table	 Approved for medical use	 Color Per Pixel Uniformity Correction
 12 bit Look Up Table	 On Screen Display	 Screenshot of image details
 30 bit Look Up Table	 Per Pixel Uniformity correction	 Application Appearance Manager
 LED backlight	 QA software included	 A virtual display
 Integrated Ambient Light Compensation	 Usable in portrait and landscape mode	 Focus light
 Backlight Output Stabilization	 Touch screen interface	 Dims auxiliary displays
 Color display	 Uniform Luminance technology	 Locates the mouse cursor
 Grayscale display	 Exceptionally wide viewing angle	 Avoids the cursor getting stuck
 Anti-reflective protective front cover	 Ultra-smooth grayscale precision	 For large-screen projection
 Anti-reflective protective front glass	 Widescreen aspect ratio	 4K native display resolution of 4096 by 2160 pixels
 Diagnostic Luminance (Ultra bright display)	 DisplayPort interface	 Allows daisy chaining of displays
 Compliant with DICOM specifications	 Multiple built-in sensors	 Displays a wide range of colors
 Long-lifetime backlights	 Cleared for breast tomosynthesis	
 Environmental-friendly product	 'Hot light' button	
 Seamless wide-screen desktop	 High-speed cine imaging without blur	
 Integrated front-of-screen sensor	 Front consistency sensor

# About Barco Healthcare

Improving the quality and value of care are the leading priorities for healthcare professionals today. At a time when the amount of data is growing rapidly and there is more demand for mobility, healthcare systems struggle to work more efficiently, and to provide personalized care to a growing number of patients in an affordable way.

Focused on transforming the delivery of care, Barco connects healthcare professionals at every patient touch point, from the imaging room, to radiology, through specialist consultations and in the surgical suite. We offer a network of medical imaging solutions that deliver the complete picture to support more informed decisions, when and where it matters most.

It's why we are considered the gold standard for medical visualization and how we are there at every stage of the patients' journey. So healthcare professionals can focus on patients' needs and, in the end, achieve the best clinical outcome.
