Host truly collaborative meetings

To help you keep control and raise the level of meeting engagement for both in-room and remote participants an advanced set of interactivity features is at your fingertips.

Touch back support

Presenters control their laptop via the touch screen in the room

As a presenter, you can control any application on your laptop via the touch screen in the meeting room, instead of using your computer mouse.

With this advanced feature, ClickShare adds energy to meetings and leads the way to more innovative ways of collaboration.

Impress, convince, focus!

Available on C-10, CX-30 and CX-50

Moderation

The moderator of the meeting controls and selects what is being shared on the meeting room display(s) and with remote particpants if a ClickShare Conference is used

As moderator, you get a preview on your laptop of all the input sources connected to the ClickShare Base Unit and you decide how the inputs are shown on the meeting room screen (up to 2 separate displays).

Possible inputs you can include:
- Content from other presenters shared via ClickShare Button or App
- Content streamed via Airplay, Google Cast, Miracast
- Content from legacy equipment via HDMI (video camera, ...)

Available on C-10, CX-30 and CX-50

BARCO

ClickShare

Blackboarding

Meeting participants use the meeting room's touch screen as a writing board

You can use the touch screen to write or sketch your ideas on the meeting room touch screen

Save your brainstorming session with one tap on the screen

Share a copy with all meeting participants connected to the ClickShare via the ClickShare Button or App

**Available on C-10, CX-30 and CX-50**

Annotation

Meeting participants add comments directly on the meeting room's touch screen

You can use the touch screen to write or sketch your ideas on the meeting room touch screen

Save your brainstorming session with one tap on the screen

Share a copy with all meeting participants connected to the ClickShare via the ClickShare Button or App

Available on C-10, CX-30 and CX-50

What's unique about interactivity features on touch-enabled displays?

• Easy and fast access to content and applications via the meeting room screen
• Direct interaction between user and content
• Intuitive experience
• Makes multitasking in meetings possible
• Assistive technology

Why use interactivity features or moderation in your meetings?

• Present more freely within the meeting space
• Ideate on content real-time
• Collaborate more interactive and creatively
• Get higher engagement from the participants
• Don't let the technical limitations of the room hinder the meeting flow
• Share notes easier afterwards
• Improve meeting outcomes and increase ROI of meetings
